Jaipur, Rajasthan, India

PROFESSIONAL SUMMARY

- AI & Machine Learning undergraduate with hands-on experience in Generative AI, LLMs, RAG pipelines, LangGraph, Computer Vision, and Machine Learning. Experienced in developing end-to-end AI applications and leading cross-functional student organizations.

EDUCATION

- Poornima University** Jaipur, India
B.Tech in Artificial Intelligence & Machine Learning (With SAS) Aug 2023 – Dec 2027
 - Current Status:** 4th Year B.Tech student (Semester VII) with a CGPA of 7.8.

SKILLS SUMMARY

- Programming Languages :** Python, SQL
- AI/ML:** Machine Learning, Deep Learning, Generative AI, RAG, LangChain, LangGraph, Neural Networks, Visual Text Analytics
- Tools & Frameworks:** FastAPI, Pandas, NumPy, PyTorch, OpenCV, Scikit-learn, Git, GitHub, Azure OpenAI
- 150+ questions on [Leetcode](#), 100+ questions on [GeeksForGeeks](#)

CERTIFICATIONS

- Data Science & SAS Viya:**
 - [SAS Visual Text Analytics in SAS Viya](#)
 - [Machine Learning Using SAS Viya](#)
 - [Statistics You Need to Know for Machine Learning](#)
 - [SAS Programming 1: Essentials](#)
 - [Neural Networks: Essentials](#)
- Oracle Cloud Infrastructure (OCI) AI Foundations Associate:** AI & ML fundamentals, Supervised & Unsupervised Learning, CNN, RNN, LSTM, LLMs.
- Software Development:** GFG Certified: [Python Full Course Online - Complete Beginner to Advanced](#)

PROJECTS

- BFSI Call Center Analytics Platform: (Python, FastAPI, LangGraph, Azure OpenAI, Azure Speech, Next.js, TypeScript, Tailwind CSS):** Built an AI-powered analytics platform for BFSI call centers that transcribes calls via Azure Speech with speaker diarization and analyzes each call across 6 dimensions — Intent, Sentiment, Summary, KPIs, Golden Journey Compliance, and SOP Violations — using a single-shot LLM prompt through LangGraph's StateGraph pipeline.
- Restaurant AI Multi-Agent Dashboard: (Python, FastAPI, LangGraph, LangChain, Groq, React, Vite, Recharts, Leaflet):** Built a multi-agent restaurant management platform with a CEO orchestrator that classifies natural-language queries using Llama 3.1 8B and routes them to specialized ReAct agents — Operations (inventory, orders, staff, waste tracking), Customer (churn analysis, loyalty tiers, feedback resolution), and Business (revenue KPIs, expense management, profit alerts) — each backed by LangGraph tool-calling agents with store-scoped SQLite database access. Designed the frontend with React 18, role-based routing (admin vs manager views), Recharts analytics dashboards, and Leaflet store-location maps, proxying all API calls to the FastAPI backend with Pydantic validation and CORS middleware. Enabled conversational restaurant operations where users manage inventory, track churn, and get AI-driven business advice through a single chat interface.
- Grape Leaf Disease Detection System: (Python, OpenCV, scikit-learn, PyTorch, Torchvision, YOLOv8, NumPy, Matplotlib):** Designed an end-to-end computer vision pipeline for grape leaf disease detection and classification by comparing traditional Machine Learning, Deep Learning, and Object Detection approaches across four disease categories—BlackRot, Esca, Healthy, and LeafBlight. Implemented HOG feature extraction with SVM classification, achieving 92.76% accuracy, and developed a custom CNN in PyTorch with data augmentation, hyperparameter tuning, confusion matrix analysis, and Grad-CAM explainability, achieving ~99% classification accuracy. Trained and evaluated a YOLOv8 object detection model for disease localization, enabling identification and visualization of affected leaf regions, while performing comprehensive data preprocessing, exploratory analysis, model evaluation, and performance comparison across all approaches.
- Corporate Car Companion Finder: (Python, Streamlit, Pandas, Geopy, Requests, BeautifulSoup, Google Maps Integration):** Developed a geospatial carpool-matching platform for corporate employees that identifies compatible travel companions by analyzing residential and workplace proximity using geodesic distance calculations. Implemented Google Maps URL and coordinate parsing with Requests and BeautifulSoup to automatically extract latitude-longitude data from shared map links, and developed a proximity-based matching engine using Geopy to connect employees within configurable distance thresholds. Designed a Streamlit-based web application featuring secure user registration, Aadhaar document uploads, vehicle management, input validation, CSV-based data persistence through Pandas, automated contact initiation, and a password-protected admin dashboard for centralized user monitoring and management.

Celebal Technologies

Jaipur, India

*Data Science Intern**Jun 2025 – Aug 2025*

- * **Technical Experience:** Completed training in Machine Learning, Deep Learning, Computer Vision, Time Series Forecasting, RAG, LLMs, LangChain, LangGraph, and Agentic AI. Worked with algorithms including SVM, Random Forest, XGBoost, LightGBM, CNNs, RNNs, LSTMs, Transformers, and YOLO while implementing hands-on assignments and real-world use cases.
- * **Project Experience:** Developed a Multi-Series Retail Demand Forecasting solution using LightGBM to predict daily sales across 50 products and 10 stores. Engineered temporal, cyclical, lag-based, and rolling statistical features, achieving ~9.5% validation SMAPE through time-series cross-validation and feature optimization.

LinuxWorld Informatics Pvt Ltd

Jaipur, India

*Machine Learning Intern**Jun 2025 – Aug 2025*

- * **Technical Experience:** Gained hands-on experience with Git, GitHub, Prompt Engineering, Computer Vision libraries (Cvzone), Web Scraping (BeautifulSoup), Streamlit application development, geospatial analytics, and end-to-end machine learning project deployment.
- * **Project Experience:** Developed Corporate Car Companion Finder, a geospatial carpool-matching platform using Python, Streamlit, Pandas, Geopy, Requests, and BeautifulSoup. Implemented Google Maps URL parsing, geodesic distance-based matching, secure user registration, document uploads, and an admin dashboard for centralized user management.

Poornima University

Jaipur, India

*Class Representative & Student Mentor**Sep 2023 – Present*

- * **Leadership:** Represented a cohort of 60+ students by acting as the primary liaison between students and faculty.
- * **Event & Operations Management:** Mentoring junior students in AI/ML fundamentals and academic goal setting, impacting their technical growth.

Students' Council, Poornima University

Jaipur, India

*Co-Chair**Aug 2024 – Apr 2025*

- * **Leadership:** Appointed as Co-Chair to oversee cross-club coordination across 30 student clubs, streamlining communication between Captains, Vice-Captains, and core council members to ensure smooth execution of 100+ university events
- * **Event & Operations Management:** Led the planning and execution of the university's flagship annual fest (a large-scale, multi-day cultural and technical event with high student participation), overseeing logistics, team delegation, timelines, and collaboration with faculty and external stakeholders.

Students' Council, Poornima University

Jaipur, India

*Vice-Captain, PU iNcENT Business Incubation Club**Sep 2023 – Aug 2024*

- * **Leadership:** Appointed as Vice-Captain to represent early-year students within the university incubation ecosystem, supporting innovation-focused programs and maintaining coordination between student teams, mentors, and administration.
- * **Innovation & Program Support:** Assisted in organizing entrepreneurship programs, startup workshops, and innovation-driven events while contributing to operational planning and student engagement initiatives.
